🌐 syednasar.vercel.app

Adaptable Front-end developer with a year of hands-on MERN stack expertise, passionate about crafting efficient and user-centric web solutions. Driven by the desire to expand my skillset. Eager to contribute my skills in a collaborative team environment to drive innovation and deliver impactful digital experiences

Skills

- React.js, Next.js and Redux
- Html, CSS and JavaScript
- Responsive design
- Version Control: Git
- API Integration
- Problem-solving
- Creativity
- Time Management

Projects

- Developed a music player using the Spotify API, offering users an interactive audio experience directly within the web application
- Designed and executed a MERN stack project enabling secure user sign-in and CRUD operations. Seamlessly managing user data and passwords, the application offers a reliable and interactive experience

Experience

Junior Full-stack Developer

2022 - present

- Successfully developed and delivered web applications and websites for a range of clients using React and Next.js. Including educational institutions, construction firms, and e-commerce businesses.
- Collaborated closely with designers and back-end teams to gather requirements, implement robust functionalities, and ensure seamless integration of features. This hands-on experience showcases my ability to translate client visions into functional, user-friendly digital experiences
- Ensured high-performance optimization by implementing techniques like caching, lazy loading, minification and image optimization.
- Proficiently used Git and version control to work on collaborative projects and streamline the development process.

Education

Thiruvalluvar University

2019-2022

- Bachelor of Computer Application (BCA)
- GPA: 7.2
